The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status

Art Unit: 2144

#### **DETAILED ACTION**

### Response to Arguments

1. Applicant's arguments, see Pages 5and 6, filed 02/14/2005, with respect to the rejection(s) of claim(s) rejected under 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of publication "Extending the IP Internet Through Address Reuse." Computer Communication Review, vol. 1, no. 23, (1993-01-01), Pages 16-33 by Tsuchiya et al.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by publication
  "Extending the IP Internet Through Address Reuse." Computer Communication Review, vol. 1,
  no. 23, (1993-01-01), Pages 16-33 by Tsuchiya et al.
  In Claim 5, Tsuchiya teaches about a Name and address server in a digital telecommunications
  network (Fig 2, DNS) having first (Fig 2, Stub A plus DNS) and second (Fig 2, Stub B, less
  DNS) addressing zones between which an interface caters for address translations, the said server
  being situated in the first addressing zone and comprising (Fig 2) (Page 18, lines 7-12):

Art Unit: 2144

a data storage module for storing associations between machine names "a1.nxb.com" and addresses of the first zone "42.81.13.22" (Page 17, lines 21-24); and (Mapping table requires storage).

a data processing module designed to respond to the receipt, originating from a first address of the first zone "42.33.96.5", of a request for provision of an address in relation to the name of a destination machine "a1.nxb.com" belonging to the second addressing zone through the transmission to a second address "42.81.13.22" of the first zone of a first packet containing at least the said name of destination machine, and to send back to the said first address, after receipt from the second zone of a second packet containing a third address "128.76.29.7" of the first zone associated in a dynamic manner with a second address of the second zone "128.76.28.4", a response providing the said third address of the first zone (Page 18, lines 1-12).

## Allowable Subject Matter

2. Claims 1-4 are allowed. The following is an examiner's statement of reasons for allowance: Tsuchiya teaches about a technique for hosting a service on a cluster of machines using network address translator but fails to teach the method disclosed by applicant. In Applicant invention there are the additional level of addressing, which is introduced by the address interface and management unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

Application/Control Number: 09/868,731

Art Unit: 2144

3. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

US 6,058,431 by Srisuresh, et al teaches about a system and method for network address

translation as an external service in the access server of a service provider.

US 6,327,662 by Araujo teaches about a security system has client receiving Java applet

downloaded from network access translator and transmitting data to server in response to

authentication request.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael S. A. Delgado whose telephone number is (571) 272-

3926. The examiner can normally be reached on 7.30 AM - 5.30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David A. Wiley can be reached on (571) 272-3923

. The fax phone number for the organization where this application or proceeding is

assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
